PROFILE

Hey, I'm Navin Chaudhary, a frontend engineer who builds things using technologies I've learned so far, I'm super passionate about technology and always eager to learn and grow. I love diving into software engineering and making cool stuff happen!

WORK EXPERIENCE

Jun 2024 – Sep 2024
Ahmadabad, India

Frontend Developer

Arihant Ai

- I started my career here and took my first step into the software engineering world. During the same time period, alongside my full-time job, I was upscaling myself from basic technologies like HTML, CSS, and JavaScript to more advanced techs like React, NextJS etc.

PROJECTS

May 2024 – Jun 2024

Gituser ⧉

- Gituser is a site where you can get all the GitHub information about any person or company by just entering a username. You will get follower, following, repositories, and much more on a single page.

Apr 2024 – May 2024

Weather App ⧉

- Weather app is a website where you will find multiple weather data points on a single page, which includes week's forecast, Temperature, Weather mode, UV, Wind, Pressure, Humidity, Sunset/sunrise time and much more.

Mar 2024 – Apr 2024

Coffe Website ⧉

- Responsive website for a coffee shop, highlighting their menu, story, and brand identity. The site was built using React, Tailwind CSS, and HTML, ensuring responsiveness for a seamless user experience across all devices.

Feb 2024 – Mar 2024

News ⧉

- News is a React app where you will find news highlights. This data is provided by the NYT API, and you can filter news by category. Additionally, you can search for articles.
